## Multi-Skilled Technician

### Description

You'll join our Production team, playing a key role in building, wiring and assembling advanced laser and robotic systems used by leading manufacturers worldwide. This is a hands-on, practical role where you'll contribute directly to the build of industrial equipment that enables life-changing products.

Your work will support the safe, reliable and high-quality delivery of Laser Wire Solutions' systems, ensuring customer specifications are met and projects are delivered on schedule.

### Typical tasks include:

- Building mechanical assemblies, sub-assemblies and piece parts to agreed build schedules.
- Assembling and wiring electrical control panels for industrial applications.
- Following standard operating procedures (SOPs) and safety protocols independently.
- Supporting machine builds from mechanical construction through to final integration.
- Assisting with fault finding and troubleshooting during build and test phases.
- Using essential software tools such as Excel and Factory Master for job tracking and documentation.
- Working closely with Engineering, Production and other teams to improve build quality, efficiency and design robustness.
- Some potential opportunities to work within Project group on Customisation projects and also within the Medical device section supporting Production runs.
- Maintaining a safe, organised and well-presented working environment.

### What We're Looking For:

- NVQ Level 3 (or equivalent) in an engineering or technical discipline.
- A practical, hands-on individual who takes pride in building things properly.
- A solid understanding of production environments and workshop processes.
- Ability to read technical drawings and follow structured build instructions.
- Strong attention to detail and commitment to quality.
- Comfortable working both independently and as part of a wider team.
- Positive, reliable and proactive in approach.
- Willingness to learn and develop technical knowledge of laser and automation systems.
- Strong communication skills (verbal and written).
- Able to thrive in a fast-paced, delivery-focused environment.
- Behaviours aligned with the Laser Wire Solutions Charter: Leadership, Authenticity, Speed, Efficiency and Responsibility.

### What You'll Get:

- Full training on our products, systems and processes.

### Hiring organization

Laser Wire Solutions

### Employment Type

Full-time

### Beginning of employment

ASAP

### Job Location

CF37 5YR

### Working Hours

37 hours per week

### Date posted

February 23, 2026

- A clear development pathway within a fast-growing, high-technology business.
- The opportunity to work on advanced laser and robotic systems used in medical, EV and high-tech industries.
- A collaborative, people-centric culture that encourages growth and innovation.
- Pension, life insurance and standard company benefits.
- 37-hour full-time role with flexible working arrangements within business needs. Opt-in Compressed Hours option.
- A supportive team environment where improvement ideas are welcomed.

### **Good To Know:**

- Location: Site-based role on the outskirts of Cardiff (own transport required).
- Start date: ASAP.
- Occasional overtime may be required in line with project delivery demands.

### **About Laser Wire Solutions**

Based in South Wales, we are at the forefront of laser and robotic technology. We work with world-leading manufacturers in medical, data and electric vehicle industries to automate production and enable world-changing devices to reach more people.

We offer a culture focused on technical excellence, innovation and continuous improvement – where individuals are empowered to make a meaningful impact and grow alongside the business.
