## Production Technician (Medical Device Products)

### Description

#### Join Our Production Team as a Production Technician

#### What You'll Do:

You'll join our Applications team initially for in-depth training and orientation and then transfer to our Production team. We will provide full training, and your primary role will be to run our laser production processes and then potentially assist applications engineering or production in other areas, as delivery commitments allow. It's a hands-on role where you'll learn quickly, work with brilliant engineers, and see your work go into real medical devices and high-value products.

Typical tasks include:

- Setting up and running jobs on laser equipment (with training) to meet our customer commitments.
- Measuring parts, capturing photographs, recording results and writing clear notes.
- Using a PC daily: Excel, email, team chat and basic software tools.
- Keeping the area safe and tidy, stocked, and ready for the next job.
- Working with Sales, Engineering and Production to solve problems and improve processes.

#### What We We're Looking For:

- A practical person who likes making things work and takes pride in doing it properly.
- Great attention to detail (you spot small changes others may miss).
- Reliable, respectful and positive – you work well on your own and with a team.
- Comfortable with measurements and basic math; an interest in physics/engineering is a bonus.
- Requires dexterity and the ability to visually inspect small parts to high accuracy.
- Clear handwriting with good record keeping.
- Will need your own transport and/or able to commute daily (ideally suit a person within ~20 mile radius).

#### What You'll Get:

- Training, mentoring and a clear development pathway.
- Varied work – new tasks and new customer challenges all the time.
- Pension, life insurance and other standard benefits.
- Flexible start/finish times within business needs and staggered holidays.
- A friendly team where help is always on hand – and where we keep things straightforward.

#### Good To Know:

#### Hiring organization

Laser Wire Solutions

#### Employment Type

Full-time

#### Beginning of employment

ASAP

#### Duration of employment

Permanent

#### Industry

Manufacturing

#### Job Location

CF37 5YR

#### Working Hours

37 hours per week

#### Date posted

January 30, 2026

This is a site-based production role (working from home cannot be accommodated). Occasional overtime may be needed, and very rare weekend work, for time-critical customer trials.
